

Mr Packermover

Logo Brand Guidelines & Concept

Brand Name

Mr Packermover

Brand Category

Packing • Moving • Relocation • Logistics

Brand Promise

No surprises. Just safe moves.

The brand should communicate that moving is not just about transporting belongings - it is about protecting what people value and making the entire moving experience stress-free.

The Brand Essence

Mr Packermover is built around the idea of safe, reliable and stress-free movement. The logo combines the visual language of packing, movement and destination, creating a distinctive identity for a modern relocation brand.

The circular movement element represents the journey from one place to another, while the central point/location cue reflects reaching the destination safely. The bold blue communicates trust and reliability, while orange adds energy, movement and action.

Together, the identity represents one simple promise:

We don't just move your belongings.
We move them with care.

Clear Space

To maintain visibility and impact, adequate clear space must surround the logo at all times.

- Minimum clear space is defined by the height of the capital letter 'M' in the logo mark.
- No text, images, busy background borders, or outer elements may enter this safety perimeter.
- The safety margin applies equally on all four sides of the logo lockup.

This ensures our logo remains highly distinct, readable, and professional in any placement.

Logo Integrity

The logo has been carefully designed as a balanced and complete unit.

- Do not alter proportions, alignment, or orientation
- Do not recreate the logo using different fonts
- Do not add effects such as shadows, outlines, or gradients
- Do not modify colors outside the approved palette
- Height and width should scale uniformly
- The relationship between the symbol and the wordmark must remain unchanged
- Stretching, compressing, or skewing the logo is not permitted

Consistent usage protects the brand's credibility and recognition.

Minimum Size

To preserve the legibility of our corporate tagline and the targeted 'o' element, the logo should never be scaled below approved minimum thresholds.

- Minimum digital width: 240 pixels (for screens, headers, app layouts).
- Minimum physical print width: 35 mm (for invoices, box stamps, packaging cards).

Scaling below this causes loss of target eye visibility and degrades professional impact.

Color Usage Guidelines

- Always maintain maximum contrast to ensure high readability at a distance.
- Use full-color white badges for digital web headers.
- Utilize the inverted Blue badge on fleet container surfaces or corporate signage.
- Avoid placing the logo on busy photographic backdrops without a neutral solid scrim container.

Color Philosophy

Our primary palette represents safe delivery, premium capability, and dynamic speed.

Primary Colors

- Deep Royal Blue: Stands for high capability, trust, professional safety, and institutional confidence.
- Safety Orange: Vermilion tone representing energetic motion, careful speed, and target accuracy.

Neutral System

- Solid White & Cool Gray: Preserves stark high-contrast boundaries for readability across packing tape and transport trucks.

The 'O' Concept

The "O" in Mover is transformed into a dynamic location symbol, combining a destination pin with circular movement arrows.

- Location Pin: Represents the destination and the customer's new place.
- Moving Arrows: Represent movement, transition, and the journey from one location to another.
- Circular Form: Communicates continuity, smooth movement, and a complete relocation journey.
- Central Point: Represents the customer's destination—where the journey ends safely.

From your current location to your new destination, safely and smoothly.
